

James River Water Development District Earth Dam Program

Requirements / Criteria:

The funding for building as well as repairing earth dams in the James River Watershed continues to be a priority for the James River Water Development District. In order to set a Standard for the Boards actions the following requirements and criteria will be followed:

1. If approved, the Board will offer up to 75% cost share on building and or repairing of each dam with a cap of \$50,000 per dam.
2. James River Water Development District will require tubes to be placed in each dam with a headspace of at least three foot; more would be better.
3. At the discretion of the Manager and or Board Member, fencing may be required to protect the berm.
4. All permits, County, State, or Federal are the responsibility of the land owner. When required, a copy of permits should be forwarded along with the Application for Project Assistance.
5. State requires a Location Notice for Dam/Dugout be completed.
6. When it is possible, a cement collar should be poured around the intake to stabilize and protect the inlet from damage as well as preventing the tube from washing out.

21 July 2016

In addition to the Application Form for Project Assistance, the James River Water Development District requires an itemized estimation of the project. I usually fill out most of the Application for the Producer. The Producer may ask you to fill out or help them fill out the Locator Form for State if needed. It usually works best if I can look at the site with you and the Producer to eliminate any problems with the application. I will certainly work with you to make getting together possible. My contact information is on the attached card.

In the case of all Earth Dams, at a minimum, the Board would like to have the following information provided:

Item	Approximate	Unit Bid	Amount Bid
	Quantity	Unit	Price
Excavation		CY	\$ \$
Equipment (Type)		hours	\$ \$
Riser (tube)		Type/size	\$ \$
Length of tube under berm		Type/size	\$ \$
Riprap		Ton	\$ \$
Geotextile Fabric		FT	\$ \$
Permits & Trucking (Mobilization)			\$ \$

Depending on the Project, there may be more items that may need to be addressed in the estimation. Some of you do an excellent job providing this information already so this will be nothing new.

David Bartel

Manager

James River Water Development District
